

## Instrumentation System

System solutions to customer specifications. Integration of IMU, Meteorological Instruments, Wave Radar, GPS, Gyro Compass, etc.

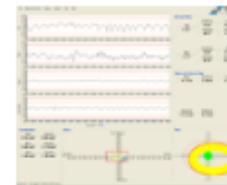

### Environmental Monitoring System

SMCems displays all kind of environmental/weather instruments. The software is normally built after customer requirements.

### Helideck Monitoring System

SMChms Monitors helideck instruments according to the Norwegian and CAP437 standards

### Motion Monitoring System

SMCmms Monitors the vessel motions and accelerations.

### Crane Monitoring System

The crane boom monitoring system monitors the crane operations with a motion sensor and a CCTV camera.

## IMU - Motion Sensors

The SMC IMU's are equipped with high precision gyros and accelerometers to achieve high performance in environments with accelerations

### IMU-106

Motion sensor for Heave measurements

### IMU-107

Motion sensor for Angles and Acceleration measurements

### IMU-108

Motion sensor for Angles, Accelerations and Heave measurements
